

Locally Manufactured Green Building Products

Compiled By [SISR Architecture, LLC](#)

This is a modest list right now but we hope that people like you will help us on this quest by [suggesting businesses](#) that we can include. And just to be clear, our office is not a third party testing agency for any of these products listed. We only hope to promote local and regional businesses (within a 500 miles radius of Keene, NH) and are relying on a good faith effort that the products listed are made locally and manufactured with the materials that their producers claim.

- [AirRenew Gypsum Wallboard](#) (Made by Certainteed in PA)
- [Colonial Green Products](#) (spray-foam insulation installer from Jaffrey, NH)
